

SECTION I. THE ASSESSMENT OF COMMUNICATIVE COMPETENCE (30 points)

Read the text and do the tasks below the text.

Sports

1 People think children should play sports. Sports are fun and children stay healthy while playing with others. However, playing sports can have negative effects on children. It may produce feelings of poor self-esteem or aggressive behaviour in some children. According to a research on kids and sports, 40 million kids play sports in the US. Of these,
5 18 million say they were shouted at or had an unpleasant experience while playing sports. This leaves many children with a bad impression of sports. They think sports are just too aggressive.

 Many researchers believe that adults, especially parents and coaches, are the main cause of too much aggression in children's sports. They believe children copy aggressive adult
10 behaviour. Then this behaviour is encouraged through both positive and negative feedback. Parents and coaches are powerful teachers because children usually look up to them. Often these adults behave aggressively themselves, sending children the message that winning is everything. In addition, media makes violence seem exciting as children watch adult sports games and see violent behaviour replayed over and over on television.

15 As a society, we really need to deal with this problem. Parents and coaches should act as better examples for children. They also need to teach children better values. They should teach children to enjoy themselves whether they win or not. Winning is not everything. Moreover, children should not be allowed to continue to play when they are hurt. Sending a child with an injury into a game gives the child the message that health is not as important as winning. If we make some basic changes, children might learn to enjoy sports again.
