COMMUNICATIVE DOMAIN

I. Assessment of Communicative Language Competences. Reading Comprehension - 30 points.

Read the text and complete the tasks that follow.

THE CLIMATE CAMPAIGNER

Greta Thunberg is an environmental activist. She was born in Stockholm, Sweden, in 2003. When she was eight, she started learning about climate change. She was very surprised because so little was being done about it. In August 2018, Greta decided to take action against climate change. She made a large sign that read 'SCHOOL STRIKE FOR CLIMATE', and calmly sat down outside the Swedish parliament. Her main aim was to make politicians take notice and act to stop global warming.

The Swedish media reported Greta's strike and tens of thousands of students from all over the world joined her #FridaysforFuture strikes. Every Friday they did not go to school and peacefully protested against climate change. In March 2019, Greta inspired climate activists across the world to organise the first Global Strike for Climate. It was huge - over 1.6 million people from 125 countries took part! Then on September 20, 2019, Greta inspired 4 million people to join another global climate strike, which was the largest climate demonstration in human history. Her small campaign had a global effect, inspiring thousands of young people across the world to organise their own strikes.

Since her strike began, Greta's life has changed a lot. She has given motivational speeches to politicians in the United Nations, US Congress, and UK parliament demanding immediate action from world leaders. Greta has appeared in some famous documentaries and a lot of articles have been written about her. She was named TIME magazine's 2019 "person of the year". Moreover, Greta was nominated for the Nobel Peace Prize in 2019. On July 20, 2020, Thunberg won the first Gulbenkian Prize for Humanity and donated the prize money of 1 million euros to charitable organisations. On January 31, 2021 Thunberg was again nominated for the Nobel Peace Prize.

Also, Greta has changed the life of her family. Greta's parents have given up eating meat, installed solar panels on their home and stopped travelling by air. Her mother, an opera singer, no longer flies abroad to her concerts as she realizes that her lifestyle is harmful to the environment.

Although Greta, a busy climate activist, had missed some classes because of her Friday strikes, she was still a very good student. She left school with 14 As and three Bs in Swedish, sports and home economics. In August 2019, Greta took a break from school because she decided to be part of the climate change movement. She sailed across the Atlantic on a yacht to attend a UN climate conference in New York. A year later, she returned to school saying that "it feels so great to finally be back in school again!" Today the 19-year-old is still one of the world's best known climate campaigners.
