Read the text and complete the tasks that follow.

Teenagers and Their Hobbies

For some people a hobby is an important part of their lives. Meet two teenagers who have taken their passion to the next level.

Kiara Tremblay is from Lacombe, a small city in Alberta, Canada. She has always been interested in art, and when she's at home, she loves painting. But Kiara doesn't paint on paper, she paints on skateboards! For her, skateboarding is much more than a simple hobby. She can't imagine living without it. Kiara is a freestyle skateboarder, and it looks just like dancing when she jumps and spins on her board.

Each year she travels to Europe for a huge skateboarding competition, and she wins again and again. Such success requires real dedication. After school, she practises for hours and still finds time to do her homework. She doesn't watch much TV, but skateboarding makes her feel strong and creative.

Oliver Ekundayo, sixteen, lives in California, USA. His best subject at school is science. Oliver enjoys reading and playing video games, but his favourite free-time activity is the robotics club. As captain of his school's robotics team, he helps design and build amazing robots. The team learns online, competes in important international tournaments and has already won many medals. Travelling abroad isn't easy for students, but Oliver loves the challenge.

He believes teenagers in the USA try to do it all — sports, volunteering, travel and clubs. He says that when you take part in different after-school activities, you learn new skills, make friends and have fun.
